### **DGPL Launches AireKit Bags for Air Crew.**

Designed and Developed by a Test Pilot of IAF for Military Air Crew

The **airekit** flight bag is the first 'Made in India' product optimised for use as a flight bag, manufactured from top-quality non-toxic materials procured from leading suppliers and fabricated at a state-of-the-art production facility adhering to a rigorous quality environment.

The **airekit** flight bag optimises contemporary flight bag designs and incorporates design improvements to suit India Military Aviators specific requirements. It is modular in design to enable utilisation for a wider spectrum of requirements. From a day-return outing to a overnight halt, the bag may be configured with different modules. The bag is also designed to attach to a foldable trolley for easy mobility and user comfort.

The airekit flight bag is also an equally suitable accessory for other 'mobile' professionals such as special forces, air-marshals, paramilitary and police personnel, security staff, photographers, drone operators, medical/ fire first-responders, service engineers and even frequent travelers.

The modular and configurable **airekit** flight bag is made up of the following components:

**Center Compartment** - The Center Compartment is the main section of the modular flight bag, designed to accommodate the pilot's 'tools-of-trade' such as headsets, iPads, sunglasses, torch, spectacles, charts, licences and other documents. The Center Compartment is available in **two** sizes (4" and 5") to suit varied requirements. These two Center Compartments can also attach to each other to provide larger, custom sizes for specific tasks.

**Front Wall** - Front Walls are the face of the modular flight bag and hosts various pockets and compartments, cleverly designed to hold the myriad of items each pilot need to carry, in an organised manner.

**Rear Wall** - Rear Walls are attached to the rear side of the Center Compartment to provide an additional sleev for storing documents, and **also** an interface to attach the bag to a foldable trolley cart.

**Trolley** (available separately) - A sturdy, lightweight, foldable Trolley makes it convenient to transport the **airekit** flight bag during the long walks to the AirCraft from Flight Complex.
